

# Setting Up Application Environment

Date	31 October 2022
Team ID	PNT2022TMID11947
Project Name	Project – Inventory Management System for Retailers

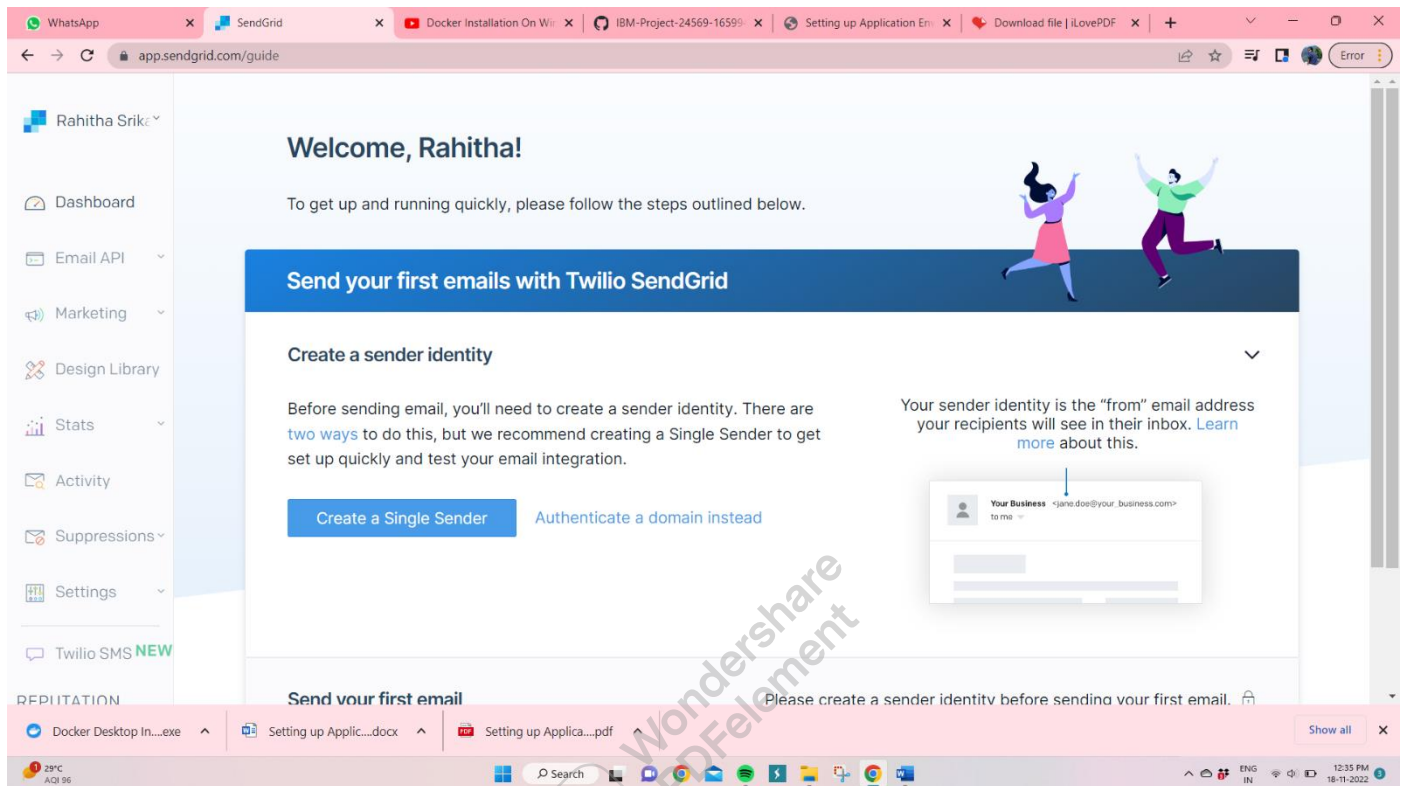

## Create IBM Cloud Account:

The screenshot displays the IBM Cloud dashboard interface. The top navigation bar includes the IBM Cloud logo, a search bar, and links to Catalog, Manage, and the user profile. The user profile dropdown menu is open, showing options for Profile, Log in to CLI and API, Privacy, Change theme, and Log out. The dashboard content area features a 'For you' section with recommendations like 'Build a web app with Watson Speech to Text' and 'Get Started with Watson Studio'. The bottom section contains links to News, Recent support cases, Planned maintenance, and IBM Cloud status.

# Docker Setup:

# Create an account in SendGrid:

The screenshot shows a web browser window with multiple tabs. The active tab is 'app.sendgrid.com/guide'. The page displays a welcome message to 'Rahitha Srikanth' and provides instructions on how to get up and running quickly. A blue banner reads 'Send your first emails with Twilio SendGrid'. Below this, the 'Create a sender identity' section explains that a sender identity is the 'from' email address. It offers two options: 'Create a Single Sender' (highlighted in a blue button) and 'Authenticate a domain instead'. A diagram illustrates the sender identity as 'Your Business <jane.doe@your\_business.com>'. At the bottom, a 'Send your first email' section prompts the user to create a sender identity before sending. The browser's taskbar at the bottom shows various open applications and the system clock indicating 12:35 PM on 18-11-2022.

Rahitha Srikanth

## Welcome, Rahitha!

To get up and running quickly, please follow the steps outlined below.

### Send your first emails with Twilio SendGrid

#### Create a sender identity

Before sending email, you'll need to create a sender identity. There are [two ways](#) to do this, but we recommend creating a Single Sender to get set up quickly and test your email integration.

[Create a Single Sender](#) [Authenticate a domain instead](#)

Your sender identity is the "from" email address your recipients will see in their inbox. [Learn more](#) about this.

**Send your first email**

Please create a sender identity before sending your first email.
